ABOUT ME

AI/ML Engineer · 6+ months building production-grade Generative AI and distributed agentic systems. Proficient in LLM API integration (OpenAI · Groq · NVIDIA NIMs), multi-agent orchestration (LangGraph), RAG pipeline design, MCP Client architecture, fault-tolerant parallel systems (ThreadPoolExecutor · Playwright), full-stack AI deployment (FastAPI · Streamlit · PostgreSQL · Supabase), and DevOps practices including Docker containerization, Docker CLI, CI/CD pipelines, and cloud deployment (Render · Streamlit Cloud). Seeking Machine Learning Engineering or Generative AI roles to architect scalable, intelligent systems.

PROFESSIONAL EXPERIENCE

Gen AI Engineer Intern · [OxiqAI](#)

May 2026 – Present

- Architected a distributed Agentic Swarm system (Sub Area Mapper) with a Master Agent orchestrating parallel Sub-Agents across a geographic hierarchy (Countries → Cities → Zones → Sub-Areas → Businesses) — each sub-agent autonomously handles its assigned workload via custom batching $K = \lceil N/C_{\max} \rceil$, with results aggregated into PostgreSQL/Supabase by the master.
- Built fault-tolerant dispatch engine (ThreadPoolExecutor · Playwright headless scraping · exponential backoff on 429s); integrating RAG (HuggingFace/OpenAI embeddings + ChromaDB) and MCP Client for standardized sub-agent tool access.

Software Engineering Intern · [Intello Labs](#)

Jul 2025 – Aug 2025

- Built update notification module for Raspberry Pi GUI app improving adoption by 40%; optimized CNN fruit-classification deployment on Linux edge devices, cutting error cycles by standardizing the test pipeline.

KEY PROJECTS

[LangGraph Agentic AI Chatbot](#)

2026

LangGraph · LangChain · ChatGroq Llama 3.3 · Streamlit · SQLite · DuckDuckGo & Alpha Vantage APIs · MCP Client · RAG (ChromaDB/FAISS – In Progress)

- Stateful multi-turn AI agent using LangGraph state graphs, conditional edges & ToolNode executors — autonomously routes web search, live stock queries, and math tools; SQLite checkpointing (SqliteSaver) for persistent cross-session memory.
- Real-time Streamlit streaming UI (st.write_stream) with collapsible tool-execution panels; RAG layer and MCP Client integration in progress for semantic document retrieval and standardized external tool communication.

[AI System Design Interview Simulator](#)

2026

FastAPI · Uvicorn · Streamlit · NLP Keyword Detection · LLM Evaluation · Render · Streamlit Cloud

- Full-stack AI app generating system design interview questions and scoring answers via NLP keyword engine (load balancer · cache · DB · queue detection) + LLM feedback — modular scoring, NLP, and evaluation engines over REST APIs.
- Deployed microservices backend on Render and frontend on Streamlit Cloud; fully cloud-hosted with zero-downtime continuous deployment.

SKILLS

GenAI & LLMs: LangGraph · LangChain · OpenAI API · Groq API · NVIDIA NIMs · Llama 3.3/3.1 · Prompt Engineering · Tool Calling · Agentic AI · RAG Pipelines · MCP Client

Multi-Agent & Systems: Multi-Agent Swarms · ThreadPoolExecutor · Concurrent Futures · Playwright (Python) · Fault-Tolerant Design · Exponential Backoff · Pipeline Registry Design

ML & NLP: PyTorch · scikit-learn · NumPy · Pandas · Matplotlib · MLflow · TF-IDF · HuggingFace Embeddings · ChromaDB · FAISS · Supervised Learning · CNN Architectures

Backend, DBs & Cloud: FastAPI · Streamlit · REST APIs · PostgreSQL · Supabase · MySQL · SQLite · Render · Streamlit Cloud · Linux · Git · Jupyter Notebook

DevOps & Cloud: Docker · Docker CLI · Docker Compose · CI/CD Pipelines (GitHub Actions) · Microsoft Azure (AZ-900 · DP-300) · Azure SQL · Azure Cloud Infrastructure · Containerization · Render · Streamlit Cloud · Environment Management

Core CS: Data Structures & Algorithms · OOP · System Design · Time & Space Complexity · JSON Schema Validation

EDUCATION

B.Tech – Computer Science · SRM University, Sonipat, Haryana

Aug 2023 – Expected May 2027 · CGPA: 7.44

ACHIEVEMENTS & CERTIFICATIONS

Winner – Smart India Hackathon (College Level) — Led 6-member team to 1st place (30+ teams); AI-powered CV solution for agricultural inspection → national round.

Google Generative AI Certification (Google, Dec 15 2025 · ID: 2025H2SIOGENAI-DE00333) · **5-Day Agentic AI Program** (Kaggle & Google, Dec 18 2025)

Microsoft Certified: Azure Fundamentals (AZ-900 · Microsoft, Nov 29 2024) · **Microsoft Certified: Azure Database Administrator Associate** (DP-300 · Microsoft, Jun 25 2026)
